## PREDICTABILITY OF STUDENT PERFORMANCE IN HEALTH-CARE RELATED EDUCATION

[DOWNLOAD](#)

VDM Verlag Sep 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - This study builds on the previous research, analyzing the degree to which various admissions requirements predict performance in a chiropractic college, as indicated by graduate GPA and National Chiropractic Board Exam scores. Data were randomly collected through institutional records on 100 graduates of a chiropractic college in the Midwest. Stepwise and induced fit multiple regression revealed that a model containing organic II grade, degree status and organic I grade was the best predictor of overall graduate performance. Based on the findings of this study, admissions offices should implement some changes to admissions practices. For instance, the research supports altering admissions procedures to place a heavier weight on organic chemistry grades. In addition, admissions offices could significantly increase the performance of chiropractic students by requiring students to have an undergraduate degree upon matriculation of the chiropractic program. 88 pp. Englisch.
