Where do you start? Almost any reputable source will tell you to eat more fruits, vegetables, and whole grains, less saturated fat and red meat, more lean poultry, fish, and low-fat dairy. To my mind, that type of recommendation is a good start, but it's just not specific enough. Which particular fruits and vegetables are best? How much dietary fat, protein and carbs should you eat and in what proportions? Which are the best food choices and most effective health supplements, based on the latest medical research? This book is the result of my personal search for the answers to those questions. I hope you will find it useful in your life as well. Physicians and scientists have been doing studies on the link between diet and health for as long as medicine has existed. But in the last 20 years or so, new insights have emerged, revealing particular foods and their remarkable health benefits. The research is on-going and most of the conclusions are not absolute or definitive. Further research...

### Reviews

*This book will never be easy to start on looking at but quite entertaining to read. It is actually packed with wisdom and knowledge. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- Ms. Missouri Satterfield DVM

*This pdf is wonderful. It really is written in simple terms instead of hard to understand. It's been developed in an exceedingly simple way and it is just after I finished reading this ebook in which in fact modified me, alter the way in my opinion.*
