Excerpt from Hand Book on Vacuum Cleaning Plants: A Treatise for the Use of Architects; Drawing Specifications for Cleaning Plants As there are several classes of vacuum cleaning apparatus on the market it is advisable to describe the principles of operation and general construction of the various types and establish a standard rating in order to secure the desired capacity in the plant selected for given conditions and to reduce the required plant to a definite capacity rather than to take miscellaneous ratings. Capacity - The Main Consideration in Selecting a Vacuum Cleaning Plant is to determine on A Standard Capacity. By this is meant the Amount of Air to Be Drawn Through Each Renovator (figured in cubic feet per minute), and also The Vacuum to Be Maintained to accomplish the desired results. No two vacuum systems on the market use the same standard of capacity in making quotations, some makers bidding on equipment two to three times larger than others. Even Though They Are Rated the Same Sweeper Capacity, therefore the engineer should determine what in...
